

Economic Relevant News from The Guardian

The dataset used in [A Flexible Supervised Term-Weighting Technique and its Application to Variable Extraction and Information Retrieval](#) can be downloaded from the following [link](#).

Dataset used for the tests performed in "Argument-based Mixed Recommenders and their Application to Movie Suggestion"

The data used for our tests consists of two parts.

The first one is based on a dataset from [Grouplens](#). The dataset we have selected contains approximately 10 millions of ratings. You can download it from [here](#).

The second part has been collected from [IMDb](#). This part extends the dataset with some extra information of each movie. You can download this extra information [here](#).

If you want to put this data in a MySQL Database this [PHP Script](#) will help you to do it.

Dataset used for the user study performed in " [A Study of Relevance Propagation in Large Topic Ontologies](#)

"

You can access the web page triplets and users' answers by following [this link](#) .

Datasets used for the tests performed in the article: "[Mining for Topics to Suggest Knowledge Model Extensions](#)"

The queries were created using [this Python code](#) , with a concept map in cxi format as an input.

The used concept maps and their associated queries were the following:

Map	Queries
Aerocapture	
Bacterial Characteristics	
Bacterial Classification	
Bioinformatics by nati	
Comparative Planetology	
Fungi Characteristics	
Moon	
Planet Mars	
Rabbits	
Sleep	
Virus Characteristics	
Volcanism
